

Delivering environmental improvements through innovation, collaboration and operational excellence

OUR PRIORITIES

Wincanton is committed to ensuring that its environmental strategy delivers tangible benefits to the environment and its business. We have identified five environmental ‘key result areas’ (KRAs) which take into account our significant environmental impacts, the priorities of our key stakeholder groups and our overall vision. These KRAs will be used to set annual objectives for our environmental programme.

KEY RESULT AREAS

Governance and management

Implement and operate environmental management systems to ensure strategic environmental risks are identified and operational excellence is achieved throughout the group

Performance measurement

Develop and implement an environmental measurement system that meets the needs of our stakeholders and the business

Energy use and climate change

Increase the overall energy and carbon efficiency of our operations

Waste and recycling

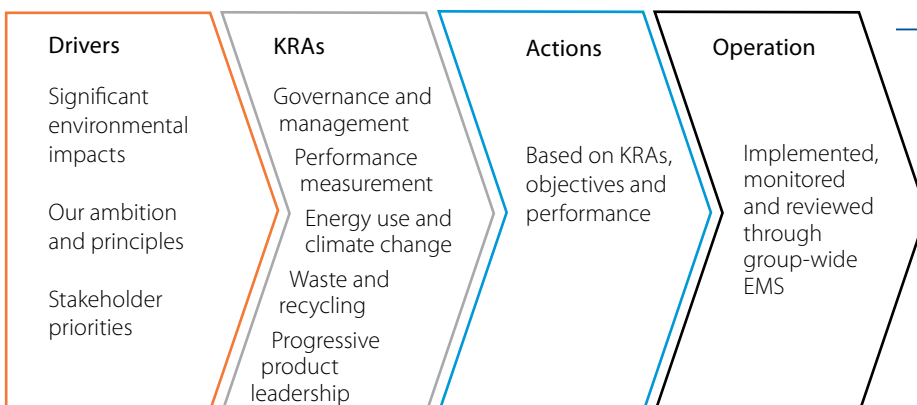

Manage and reduce operational waste through prevention, reuse and increased rates of recycling

Progressive product leadership

Develop innovative products and services that help our customers manage and measure their environmental performance and increase their environmental sustainability

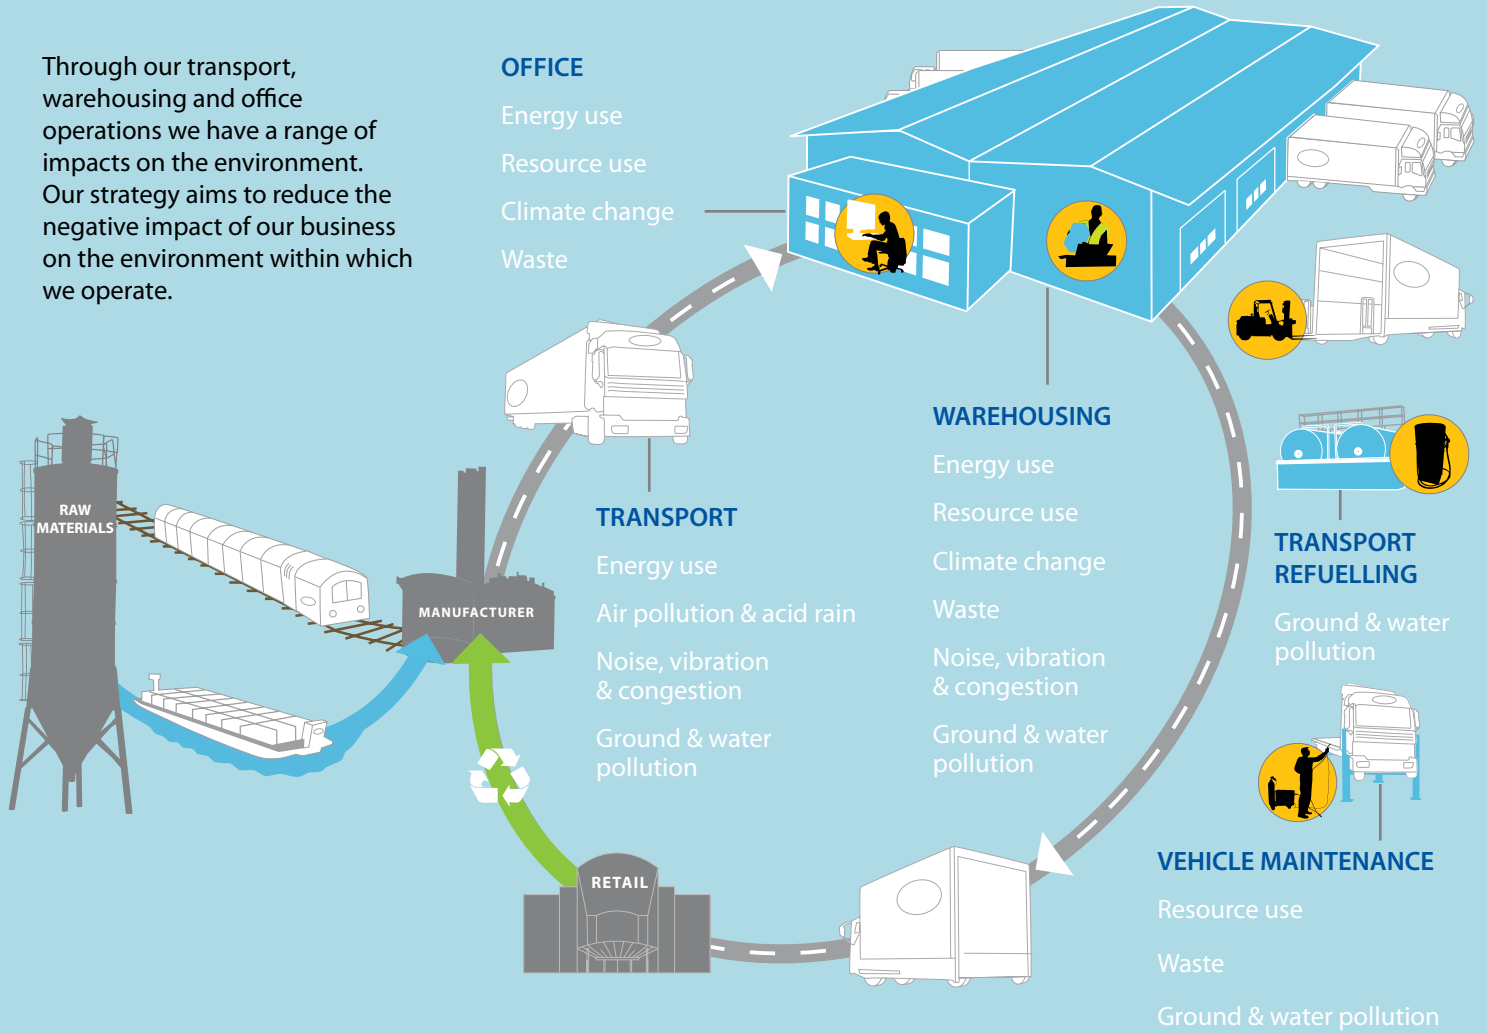

“ THIS STRATEGY IS THE CULMINATION OF A YEAR LONG PROGRAMME OF PLANNING AND RESEARCH WHICH HAS HELPED US ESTABLISH OUR ENVIRONMENTAL PRIORITIES AS A BUSINESS AND UNDERSTAND OUR RESPONSIBILITIES TO OUR VARIOUS STAKEHOLDER GROUPS ”

Graeme McFaul
CEO

SIGNIFICANT ENVIRONMENTAL IMPACTS

Through our transport, warehousing and office operations we have a range of impacts on the environment. Our strategy aims to reduce the negative impact of our business on the environment within which we operate.

OUR ENVIRONMENTAL POLICY STATEMENT AND PRINCIPLES

Wincanton is committed to the principle of environmental sustainability and recognises that it has a responsibility to comply with relevant laws and act with integrity towards its stakeholders.

To demonstrate this commitment we have developed ten environmental principles to provide guidance on the way we identify and manage our impacts on the environment:

1. Integrate environmental considerations into key business decisions
2. Develop progressive products and services that help our customers improve their environmental performance
3. Ensure operational excellence and legal compliance through the operation of environmental management systems and the provision of training for employees
4. Monitor, measure and continuously improve our environmental performance
5. Communicate our progress to our customers, employees and investors
6. Minimise the consumption of fossil fuels, emissions of carbon dioxide and other greenhouse gases
7. Minimise our consumption of non-renewable and environmentally sensitive resources
8. Minimise the amount of waste produced through prevention, reuse and recycling
9. Prevent ground and water pollution and minimise emissions of air borne pollutants
10. Minimise the negative impact of our activities on local communities

" We can make a positive change across our business that will make a real difference "

Graeme Mcfaull
