

Wincanton Environmental Policy Statement and Principles

Wincanton is committed to the principle of environmental sustainability and recognises that it has a responsibility to comply with relevant laws and act with integrity towards its stakeholders. To demonstrate this commitment we have developed ten environmental principles to guide us in the way we identify and manage our impacts on the environment.

- 1. Integrate:** We will integrate environmental considerations into key business decisions.
- 2. Develop:** We will develop progressive products and services that help our customers improve their environmental performance.
- 3. Management systems:** We will ensure operational excellence and legal compliance through the operation of environmental management systems and the provision of training for employees.
- 4. Measure:** We will monitor, measure and continuously improve our environmental performance.
- 5. Communicate:** We will communicate our progress to our customers, employees and investors.
- 6. Carbon emissions:** We will minimise the consumption of fossil fuels and the associated emissions of carbon dioxide, and other greenhouse gases.
- 7. Resources:** We will minimise our consumption of non-renewable and environmentally sensitive resources.
- 8. Waste:** We will minimise the amount of waste produced through prevention, reuse and recycling.
- 9. Pollution:** We will prevent ground and water pollution and minimise emissions of airborne pollutants.
- 10. Communities:** We will minimise the negative impact of our activities on local communities and engage positively with the communities in which we operate

This commitment will provide the framework for setting and reviewing environmental objectives and targets, and will be reviewed periodically to ensure that it remains appropriate for the type of operations that we undertake. For a copy of the full environmental strategy document please email getintouch@wincanton.co.uk for more details contact Marketing on **+44 (0)1249 710000**
